P R O J E C T S

1. FullStack Ecommerce Website Using Angular & Spring-Boot: **(Jul 2023)**

- Developed a dynamic Ecommerce website using Angular and Spring-Boot, showcasing over 100 products.
- Implemented advanced search, responsive shopping cart, and secure user authentication with Auth0.
- Hosted the website with a custom domain, "luv2shop.site" in AWS.
- Achieved AWS deployment with SSL for enhanced security and integrated Stripe for versatile payment processing.
- Designed an efficient order management system and order history feature for user convenience.
- Employed version control with Git for streamlined project development.

2. Personal Portfolio Website. **(Aug 2023)**

- Successfully launched a personal portfolio website, demonstrating proficiency in web technologies including HTML, CSS, and JavaScript.
- Designed a responsive website on Figma for optimal display on various devices.
- Employed SCSS for efficient and enjoyable CSS development.
- Showcased a collection of completed projects on the website, highlighting practical work and achievements.
- Utilized Git for version control to ensure systematic and efficient development.
- Hosted the website with a custom domain, "harshan2602.in," directly on GitHub for enhanced accessibility and professionalism.
