P R O J E C T S

1. **FullStack Ecommerce Website Using Angular & Spring-Boot:**   **(May 2023)**

    - Developed a dynamic Ecommerce website using Angular and Spring-Boot, showcasing over 100 products.
    - Implemented advanced search, responsive shopping cart, and secure user authentication with Auth0.
    - Hosted the website with a custom domain, "luv2shop.site" in AWS.
    - Achieved AWS deployment with SSL for enhanced security and integrated Stripe for versatile payment processing.
    - Designed an efficient order management system and order history feature for user convenience.
    - Employed version control with Git for streamlined project development.

2. **Personal Portfolio Website.**   **(Aug 2023)**

    - Successfully launched a personal portfolio website, demonstrating proficiency in web technologies including HTML, CSS, and JavaScript.
    - Designed a responsive website on Figma for optimal display on various devices.
    - Employed SCSS for efficient and enjoyable CSS development.
    - Showcased a collection of completed projects on the website, highlighting practical work and achievements.
    - Utilized Git for version control to ensure systematic and efficient development.
    - Hosted the website with a custom domain, "harshan2602.in," directly on GitHub for enhanced accessibility and professionalism.
